

ISO System Level Forecasts

Forecast with Confidence. Compete with Precision.

Wholesale markets move fast, and the cost of being wrong is significant.

Traders, risk managers and system operators turn to Innowatts to support confident bidding, proactive risk management, and enhanced grid reliability. Our ISO System Level Forecasts deliver highly accurate day-ahead +13 outlooks that enable our clients to stay ahead of price shifts and demand peaks.

14-Day Forecast Horizon

Industry-leading performance from day-ahead +13. Includes corresponding weather forecast and advanced features:

- Backcast
- Forecast Performance
- Similar Day Forecast
- Alerts/Notifications

High Resolution

Forecasts are updated and available hourly, system-wide and by zone/region.

Multi-ISO Coverage

Available for ERCOT, PJM, ISONE, NYISO, MISO, and CAISO

Flexible Access

ISO forecasts are delivered directly to your inbox and are available via the Innowatts platform, giving you timely insights wherever you work.

ERCOT Precision in Action

	<u>Coincidental Peak</u>	<u>Record Demand</u>

**Our DA MAPEs are consistently <2%,
with high precision even during
periods of volatility.**

Don't just take our word for it...

“For Southern Company, Innowatts' System Level Forecast ranks #1 in load forecast accuracy for one-day-ahead through five-day-ahead time periods.

Tommy Waggoner, Operations Services Manager
Southern Company

“Innowatts' ISO-level forecast supports our short-term operations. The forecasts have been accurate, even amid volatile market conditions.”

Lucas Turner, QSE Manager
South Texas Electric Cooperative, Inc.
